Surface Preparation and Pretreatment

Ensure surface is clean, dry and intact, using a high performance solvent cleaner. DeSoto[®] CN20 or Desoclean[™] 45 solvent cleaner are recommended. Observe recommended overcoating window for primers.

Instructions for Use

Base may require mechanical agitation. Ensure all components are adequately dispersed. Thoroughly stir or shake the base component until a smooth uniform mix is obtained. Immediately after adding the activator to the base, stir thoroughly until uniform. Add required reducer while stirring.

Note: All products and components should be placed in ambient conditions of 15-30°C (59-86°F) for at least 24 hours prior to mixing and application.
