

Semco® 1010 high-pressure injection gun

Description

The Semco® 1010 high-pressure injection gun is designed to inject high-viscosity non-curing sealing compounds in void and channel filling applications that require high pressure through small orifices. The standard retainer is designed to accept materials pre-packaged in 6 oz. *Semco* cartridges.

Technical Information

The *Semco* 1010 high-pressure injection gun has a stroke length of 2.0". The orifice pressure is approximately 21x that of the incoming air. The maximum operating pressure for incoming air is 120 psi, which would equate to a maximum pressure rating of 2,100 psi at the application point of an attached 36" reinforced hose. This unit features a pressure relief mechanism limiting the input pressure from exceeding 100 psi.

Features & Benefits

- Pressure relief mechanism prevents accidental channel blowout
- Certified ATEX Group II, Zone 2, Category 3 for use in areas potentially containing explosive vapors
- CE certified
- Resistance to corrosion in salt-fog testing
- Ergonomic design for easy one-person lift and operation

For industrial use only. Keep away from children.
